

WE TAKE OUR CELLS SERIOUSLY™

GlobalStem Custom Solutions™

What's your project? GlobalStem can help!

GlobalStem Custom Solutions™ brings your organization unique opportunities to tackle problems where your experience may be limited or you don't have the necessary resources.

GlobalStem works as an extension of your research team to provide experienced scientific resources, creative talent and novel solutions to stem cell projects such as:

Cell expansion, engineering, characterization and banking

Whether engineering specialized cells, manufacturing robust lots, working out ideal growth conditions or characterizing your proprietary cells, GlobalStem experience is unbeatable.

Deriving stem and primary cells from tissue

Diligence, skill and a passion for the task drive our team to deliver superior and reliable materials consistently.

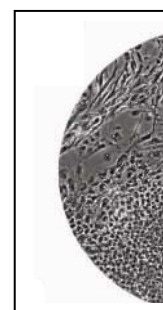

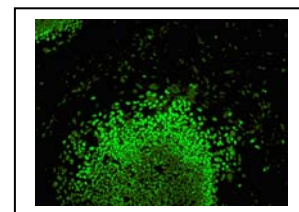

Proprietary and/or novel cell therapy projects

Adding a new perspective or consultation to your team can lead to dynamic breakthroughs that can save valuable time and help you meet your goals within or under budget.

How GlobalStem Custom Solutions works.

The GlobalStem team works with you to determine the scope and objectives of your project and then presents a proposal complete with milestones and terms. Once the details of the project are finalized, your GlobalStem project leader keeps you updated with regular reports. Should new information from your side or ours suggest that changes in the project may need to be considered, you can be confident that we'll work with you to assess the data, implement cost-effective changes and find the best solution.

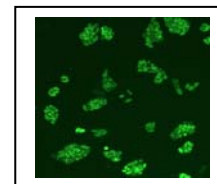

Get started today with a GlobalStem Custom Solution for your project!
